Emergency Numbers

For aid in Fire, Police,
Rescue/Ambulance,
Sheriff
EMERGENCIES

In the
Superior Area
Including
Douglas County

Dial only 3 digits

9-1-1

Voice/TTY

Or dial "0" (Operator)

Tell the operator the exact location including the community name, street number and the type of help needed. Stay at the telephone.

Dial these numbers only in a real emergency. For non-emergency calls, dial the numbers shown in the "NON-Emergency Administrative Numbers" listing for the proper agency.

Other Emergency Numbers

Coast Guard Marine &
Air Emergency-Duluth720-5412

Or 720-5413

FBI - Eau Claire 715 835-3761

If no answer,
dial Milwaukee 414 276-4684

Forest Fire 911

Poison Center 800 815-8855

State Patrol-Spooner 715 635-2141

U.S. Secret Service -
Madison 608 264-5191

HOW TO FIND AN ADDRESS

In an effort to enable Emergency Response to County Residents and Postal Delivery, every residence in the County has been assigned an address number. The sign is located at the public or private road leading to their residence. In most cases numbers are posted on a sign located near their driveway.

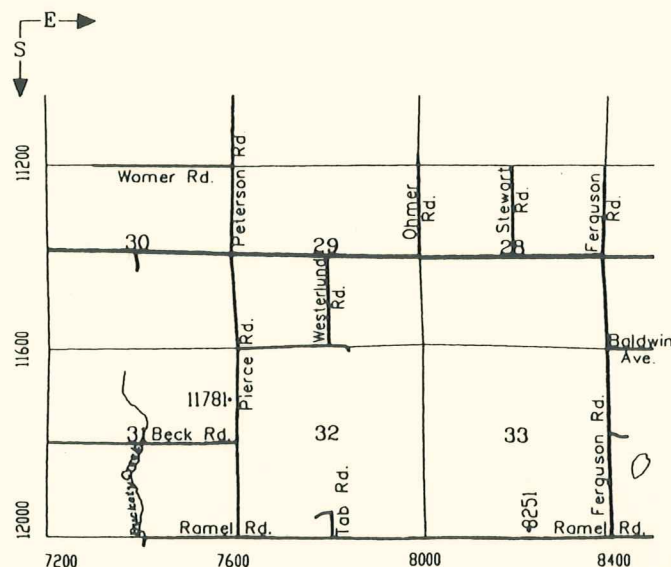

The sign includes the township name, numbers, and "S" or "E" depending on the road direction.

The County Addressing System is in grid format with 400 numbers to the mile. The numbers starting at the north border of the County get larger going to the south. The letter "S" following the numbers indicates the north/south direction of the road with even numbers on the east side and odd numbers on the west side. The letter "E" following the numbers indicates the east/west direction of the road with odd numbers on the north side and even numbers on the south side. Numbers starting at the west also get larger going to the east.

North South Direction: To find 11781 Pierce Rd. on the sample map to the right, you would go to the left margin and find the grid number 11600 and continue down the road until you see the number 11781 which would be approximately 1/4 mile south of 11600.

East West Direction: To find 8251 Ramel Rd., go to the grid across the bottom of the map and find grid number 8000. Follow the numbers along the road until you come to 8251 which would be approximately 1/2 mile east of 8000.

Remember, addresses get larger going to the south and to the east in Douglas County. Road Name Index and locations can be found at the end of this book.

NOTICE

Douglas County is aware of the increasing number of professional people who are making copies of our plat book map pages for business use. Such use of our copyrighted maps, without our permission, is prohibited.

If you desire to make copies of our material for business use, we will be happy to license you for a modest fee of \$25.00, or you may purchase extra plat books from us and use the original pages only for your business purposes.

PROCEDURE FOR SALE OF TAX DEEDED LANDS

The following procedure applies to the sale of tax deeded lands and conforms with Section 75.35 of the Wisconsin Statutes:

1. A request for appraisal of a piece of land is made to the County Clerk's Office.
2. An Appraisal Application Form for Douglas County Land (Form #9-1) is completed by County Clerk staff. This form is sent to the supervisor of the district in which the property is located for a recommended valuation. A copy is sent to the City Planner (if located in the City of Superior); Municipal Chair (if located in the rural area); County Zoning Department; County Highway Department; County Forestry Department (depending on location); and Superior-Douglas County Development Association.
3. The Land and Development Committee receives a copy of the appraisal form (#9-1) with their meeting agendas. At the next meeting, the committee will decide whether to approve the property for sale and set an appraisal, or to hold the property from sale.
4. After the committee has appraised the property, the County Clerk's office sends a bid form to the individual requesting said property. Bid forms are also sent to adjacent property owners and are available for others in the County Clerk's Office. Property is advertised three times; sealed bids are accepted and opened at the following Land and Development Committee meeting.
5. The reviews the bids and awards the property based on the following criteria:
 - (a) Dollar value;
 - (b) Prospective use of property;
 - (c) Prior ownership;
 - (d) Adjacent property ownership;
 - (e) Taxability of property upon transfer;
 - (f) Build ability under present zoning codes;
 - (g) Access; and
 - (h) Any other criteria the Land and Development Committee wishes to consider to evaluate any bid.
6. Notice of the pending sale is mailed to the clerk of the municipality in which the real estate is located at least three weeks prior to the time of sale.
7. A resolution is presented to the Board approving the sale.
8. A Quit Claim Deed is made out to the successful bidder.
9. If no bids are received for advertised property, they may be sold for an amount equal to or above the appraised value, without re-advertising. These sales are then referred to the Land and Development Committee for approval and to the County Board through a special land sales resolution.

IMPORTANT FACTS ABOUT LAND DESCRIPTIONS

LAND MEASUREMENTS, TOWNSHIPS, SECTIONS,
MEANDERED WATER, GOVERNMENT LOTS, ETC.

WHAT IS A LAND DESCRIPTION?

A LAND DESCRIPTION IS A DESCRIPTION OF A TRACT OF LAND IN LEGALLY ACCEPTABLE TERMS, SO AS TO SHOW EXACTLY WHERE IT IS LOCATED AND HOW MANY ACRES IT CONTAINS.

TABLE OF LAND MEASUREMENTS

LINEAR MEASURE		SQUARE MEASURE	
1 inch.....0.0833 foot	16½ feet.....1 rod	144 sq. in.....1 sq. ft.	43560 sq. ft.....1 acre
7.92 inches.....1 link	5½ yards.....1 rod	9 sq. ft.....1 sq. yd.	640 acres.....1 sq. mile
12 inches.....1 foot	4 rods.....100 links	30½ sq. yds.....1 sq. rod	1 sq. mile.....1 section
1 vara.....33 inches	66 feet.....1 chain	16 sq. rods.....1 sq. chain	36 sq. miles.....1 township
2¼ feet.....1 vara	80 chains.....1 mile	1 sq. rod.....272¼ sq. ft.	6 miles sq.....1 township
3 feet.....1 yard	320 rods.....1 mile	1 sq. chain.....4356 sq. ft.	208 ft. 8 in sq.....1 acre
25 links.....16½ feet	8000 links.....1 mile	10 sq. chains.....1 acre	80 rods sq.....40 acres
25 links.....1 rod	5280 feet.....1 mile	160 sq. rods.....1 acre	160 rods sq.....160 acres
100 links.....1 chain	1760 yards.....1 mile	4840 sq. yds.....1 acre	

In non-rectangular land descriptions, distance is usually described in terms of either feet or rods (this is especially true in surveying today), and square measure in terms of acres. Such descriptions are called Metes and Bounds descriptions and will be explained in detail later.

In rectangular land descriptions, square measure is again in terms of acres, and the location of the land in such terms as N½ (north one-half), SE¼ (south east one-fourth or quarter), etc. as shown in Figures 2, 3, 4 and 5.

MEANDERED WATER & GOVERNMENT LOTS

A meandered lake or stream is water, next to which the adjoining land owner pays taxes on the land only. Such land is divided into divisions of land called government lots. The location, acreage and lot number of each such a tract of land, was determined, surveyed and platted by the original government surveyors.

The original survey of your county (complete maps of each township, meandered lakes, government lots, etc.) is in your courthouse, and this original survey is the basis for all land descriptions in your county (See figure 1).

IMPORTANT

THE GOVERNMENT LOT NUMBER GIVEN TO A PIECE OF LAND, IS THE LEGAL DESCRIPTION OF THAT TRACT OF LAND.

HOW CAN YOU TELL WHETHER WATER IS MEANDERED OR PRIVATELY OWNED?

On our township maps, if you find government lots adjoining a body of water or stream, those waters are meandered. If there are no government lots surrounding water, that water is privately owned, the owner is paying taxes on the land under the water, and the owner controls the hunting, fishing, trapping rights, etc., on that water, within the regulations of the State and Federal laws, EXCEPT where such water is deemed navigable, other rulings may sometimes pertain.

As a generally (but not always), meandered water is public water which the public may use for recreational purposes, fishing, hunting, trapping, etc., provided that there is legal access to the water, or in other words, if the public can get to such waters without trespassing. There still is much litigation concerning the same to be decided by the courts.

FIGURE 1

SAMPLE SECTIONS SHOWING RECTANGULAR LAND DESCRIPTIONS, ACREAGES AND DISTANCES

FIGURE 2

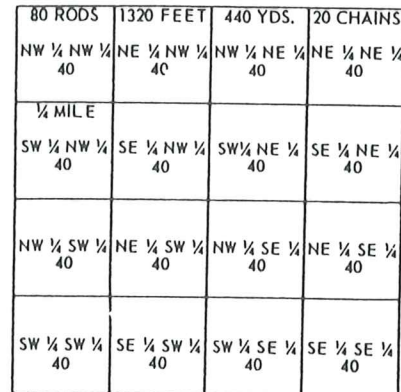

FIGURE 3

FIGURE 4

FIGURE 5

THE BEST WAY TO READ LAND DESCRIPTIONS IS FROM THE REAR OR BACKWARDS.

Descriptions of land always read FIRST from either the North or the South. In figures 2, 3, 4 and 5, notice that they all start with N (north), S (south), such as NW, SE, etc. They are never WN (west north), ES (east south) etc.

IMPORTANT: It is comparatively simple for anyone to understand a description, that is, determine where a tract of land is located, from even a long description. The SECRET is to read or analyze the description from the rear or backwards.

EXAMPLE: Under figure 4, the first description reads E½, SE¼, SW¼, SW¼. The last part of the description reads SW¼, which means that the tract of land we are looking for is somewhere in that quarter (as shown in figure 2). Next back we find SW¼, which means the tract we are after is somewhere in the SW¼ SW¼ (as shown in Figure 3). Next back, we find the SE¼, which means that the tract is in the SE¼ SW¼ SW¼ (as shown in figure 5). Next back and our last part to look up, is the E½ of the above, which is the location of the tract described by the whole description (as shown in figure 4).

TO INTERPRET A LAND DESCRIPTION - LOCATE THE AREA ON YOUR TOWNSHIP PLAT,
THEN ANALYZE THE DESCRIPTION & FOLLOW IT ON THE PLAT MAP.

TOWNSHIP SURVEY INFORMATION

DIAGRAM SHOWING HOW SECTIONS ARE
NUMBERED IN A TOWNSHIP

6	5	4	3	2	1
7	8	9	10	11	12
18	17	16	15	14	13

30	29	28	27	26	25
31	32	33	34	35	36

FIGURE 6

TOWNSHIPS

Theoretically, a township is a square tract of land with sides of six miles each, and containing 36 sections of land. Actually this is not the case. Years ago, when the original survey of this state was made by the government engineers, they knew that it was impossible to keep a true north and south direction of township lines, and still keep getting township squares of 36 square miles. As they surveyed toward the north pole, they were constantly running out of land, because the township lines were converging toward the north pole.

If you will turn to one of the township maps in this plat book, you will notice that on the north and on the west of each township, there are divisions of land which show odd acreages. In some townships, these odd acreages are called government lots (because they were given a lot number), and at other times left as FRACTIONAL FORTIES OR EIGHTIES. It was at the option of the original government surveyors as to whether they would call these odd acreages government lots, or fractional forties and eighties.

The reason for these odd acreages is that the government surveyors adjusted for shortages of land which developed as they went north, by making fractional forties, eighties or government lots out of the land on the west side of a township, and the same for the land

**A CONGRESSIONAL TOWNSHIP
CONTAINS 36 SECTIONS OF LAND
1 MILE SQUARE**

**A CIVIL OR POLITICAL TOWNSHIP
MAY BE LARGER OR SMALLER THAN
A CONGRESSIONAL TOWNSHIP.**

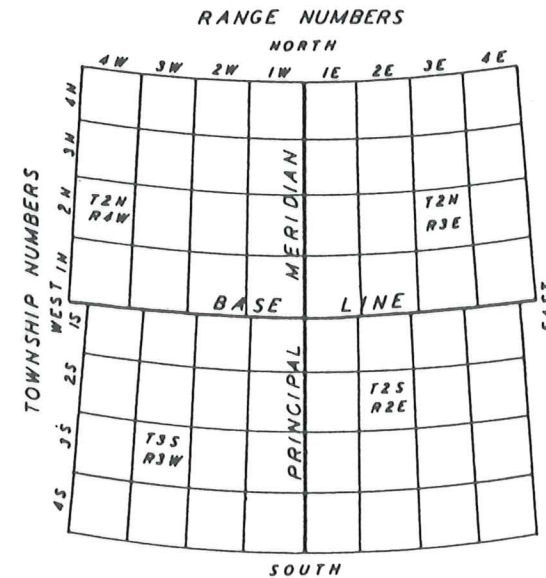

FIGURE 7

on the north side of a township to keep east and west lines running parallel. In other words it was impossible to fit full squares into a circle.

Townships sometimes vary in size from the regularly laid-out township. (see figure 6). Suppose that the dotted line in figure 6 is a river separating two counties. The land north and west of the river could be a township in one county, the land south and east could be a township in another county. Which ever county the land is in, it still retains the same section, township and range numbers for purposes of land descriptions.

Each township has a township number and also a range number (sometimes more than one of each if the township is oversized, or a combination of more than one township and range).

Government surveying of townships is run from starting lines called base lines and principal meridians. Each township has a township number. This number is the number of rows or tiers of townships that a township is either north or south of the base line. Also each township has a range number. This number is the number of rows or tiers of townships that a township is either east or west of the principal meridian (See figure 7). EVERY DESCRIPTION OF LAND SHOULD SHOW THE SECTION, TOWNSHIP AND RANGE IT IS LOCATED IN.

**TOWNSHIPS MAY BE EITHER NORTH OR SOUTH OF THE BASE LINE.
RANGES MAY BE EITHER EAST OR WEST OF THE PRINCIPAL MERIDIAN.**

METES AND BOUNDS DESCRIPTIONS AND EXPLANATION OF DIRECTION IN TERMS OF DEGREES

WHAT IS A METES AND BOUNDS DESCRIPTION? It is a description of a tract of land by starting at a given point, running so many feet a certain direction, so many feet another direction etc., back to the point of beginning. EXAMPLE: In figure 1 notice the small tract of land outlined. The following would be a typical metes and bounds description of that tract of land. "Begin at the center of the section, thence north 660 feet, thence east 660 feet, thence south 660 feet, thence west 660 feet, back to the point of beginning, and containing 10 acres, being a part of Sec. No. etc."

IMPORTANT: To locate a tract of land from a metes and bounds description, start from the point of beginning, and follow it out (do not read it backwards as in the case of a rectangular description).

The small tract of land just located by the above metes and bounds description could also be described as the SW $\frac{1}{4}$ SW $\frac{1}{4}$ NE $\frac{1}{4}$ of the section. In most cases, the same tract of land may be described in different ways. The rectangular system of describing and locating land as shown in figures 2, 3, 4 and 5 is the most simple and almost always used when possible.

A circle contains 360 degrees. Explanation: If you start at the center of a circle and run 360 straight lines an equal angle apart to the edge of the circle, so as to divide the circle into 360 equal parts, THE DIFFERENCE OF DIRECTION BETWEEN EACH LINE IS ONE DEGREE.

In land descriptions, degree readings are not a measure of distance. They are combined with either North or South, to show the direction a line runs from a given point.

HOW TO READ DESCRIPTIONS WHICH SHOW DIRECTIONS IN TERMS OF DEGREES

In figure 8, the north-south line, and the east-west line divide the circle into 4 equal parts, which means that each part contains 90 degrees as shown. Several different direction lines are shown in this diagram, with the number of degrees each varies east or west from the north and south starting points (remember again that all descriptions read from the north or south).

We all know what north-west is. It is a direction which is half-way between North and West. In terms of degrees the direction north-west would read, north 45 degrees west. (See figure 8).

EXAMPLE OF A LAND DESCRIPTION IN TERMS OF DEGREES

At this time, study figure 8 for a minute or two.

In figure 8, notice the small tract. The following metes and bound description will locate this small tract. "Begin at the beginning point, thence N 20 degrees west - 200 feet, thence N 75 degrees east - 1190 feet, thence S 30 degrees east - 240 feet, thence S 45 degrees west - 420 feet, thence west - 900 feet back to the point of beginning, containing so many acres, etc."

Wisconsin Department of Natural Resources
(608) 266-2621
www.dnr.state.wi.us

Public Access - Detailed access information is available for most counties in the state. Many public fishing piers are now wheelchair-accessible. For information on specific access sites, contact your nearest DNR office. Each office has a copy of *Fishing and Boating Access for Everyone*. Copies of individual location maps with descriptions of the amenities available at that site can be provided to you. In the column titled "Public Access," the following abbreviations describe existing access where information is available:

- BR** Boat Ramp. These are sites with a defined public boat launching facility which may or may not have parking.
- BF** Barrier-free Boat Ramp. These sites have a boarding dock or means of wheelchair access to boats.
- P** Barrier-free Pier. These piers were designed to accommodate wheelchairs.
- T** Walk in Trail. These access sites are partially developed, excluding a boat ramp, and are entirely within public lands.
- R** Roadside. These sites do not include any access developments. Public roads with a marked right-of-way extending to the water provide a limited degree of access.
- W** Wilderness in Public Ownership. A lake is in a wilderness area if there are no roads or buildings within 200 feet of the waterbody. Wilderness lakes have no defined walk-in trail to the water.
- BW** Barrier-free Wilderness Access. These sites have a firm surface to gain access to the water, but no special piers or ramps.
- NW** Navigable Water. Navigable access is provided by the presence of an inlet or outlet stream which furnishes adequate boat access to a lake. A small stream not large enough to float a boat does not provide effective navigable access.

A few counties do not have detailed access information. For those waters marked with an "x," some type of access, other than navigable water access, is available.

Regulations governing boat usage are effective on certain lakes and are posted at the public access sites.

Map - If a lake survey map showing the contour depths in a lake is available, an "X" appears in the column called "Map." Nearly half of all the named lakes in the state have been mapped. Lake survey maps provide valuable information for lake property owners and anglers who wish to know more about the lake depths.

Lake Type

The following abbreviations describe the category of lake type:

- DG = Drainage lake
SE = Seepage lake
SP = Spring lake
DN = Drained lake

Species of fish - The relative abundance of various game fish species including muskellunge, northern pike, walleye, largemouth bass, smallmouth bass, panfish, trout, catfish and sturgeon is listed. Abundance of a fish species is coded using the following symbols:

- A = Abundant
C = Common
P = Present

The absence of any symbol means that a fish species is not present.

Area	Maximum Depth	Mean Depth	Public Access	Lake map	Lake Type	Muskie	Northern Pike	Walleye	LM bass	SM bass	Panfish	Trout	Catfish	Sturgeon	Mercury in fish

Mercury in fish - Fish from about 600 Wisconsin lakes have been tested to measure the amount of mercury in the filets. This publication identifies those lakes that have been tested, and which ones contain advisories. Where there is mercury data, the following two symbols summarize the available information:

- ✓ One or more fish species present in the lake have been tested for mercury levels, and no advisory is necessary.
- One or more fish species present in the lake have been tested for mercury levels and the lake is under a consumption advisory.

(blank) No fish tested as of 1995.
