The Landowners index located in the back of the book shows landowner name, page number and section number. Landowners listed but not found on the map are likely small tract owners (parcels under 5 Acres).

The contents of this platbook have been compiled from many sources and are believed to be substantially accurate. Every effort has been made to assure accuracy. It is impossible to guarantee 100% accuracy. The maps are updated with each publication. The contents of this platbook are not intended for legal use.

PROCEDURE FOR SALE OF TAX DEEDED LANDS

The following procedure applies to the sale of tax deeded lands and conforms with Section 75.35 of the Wisconsin Statutes:

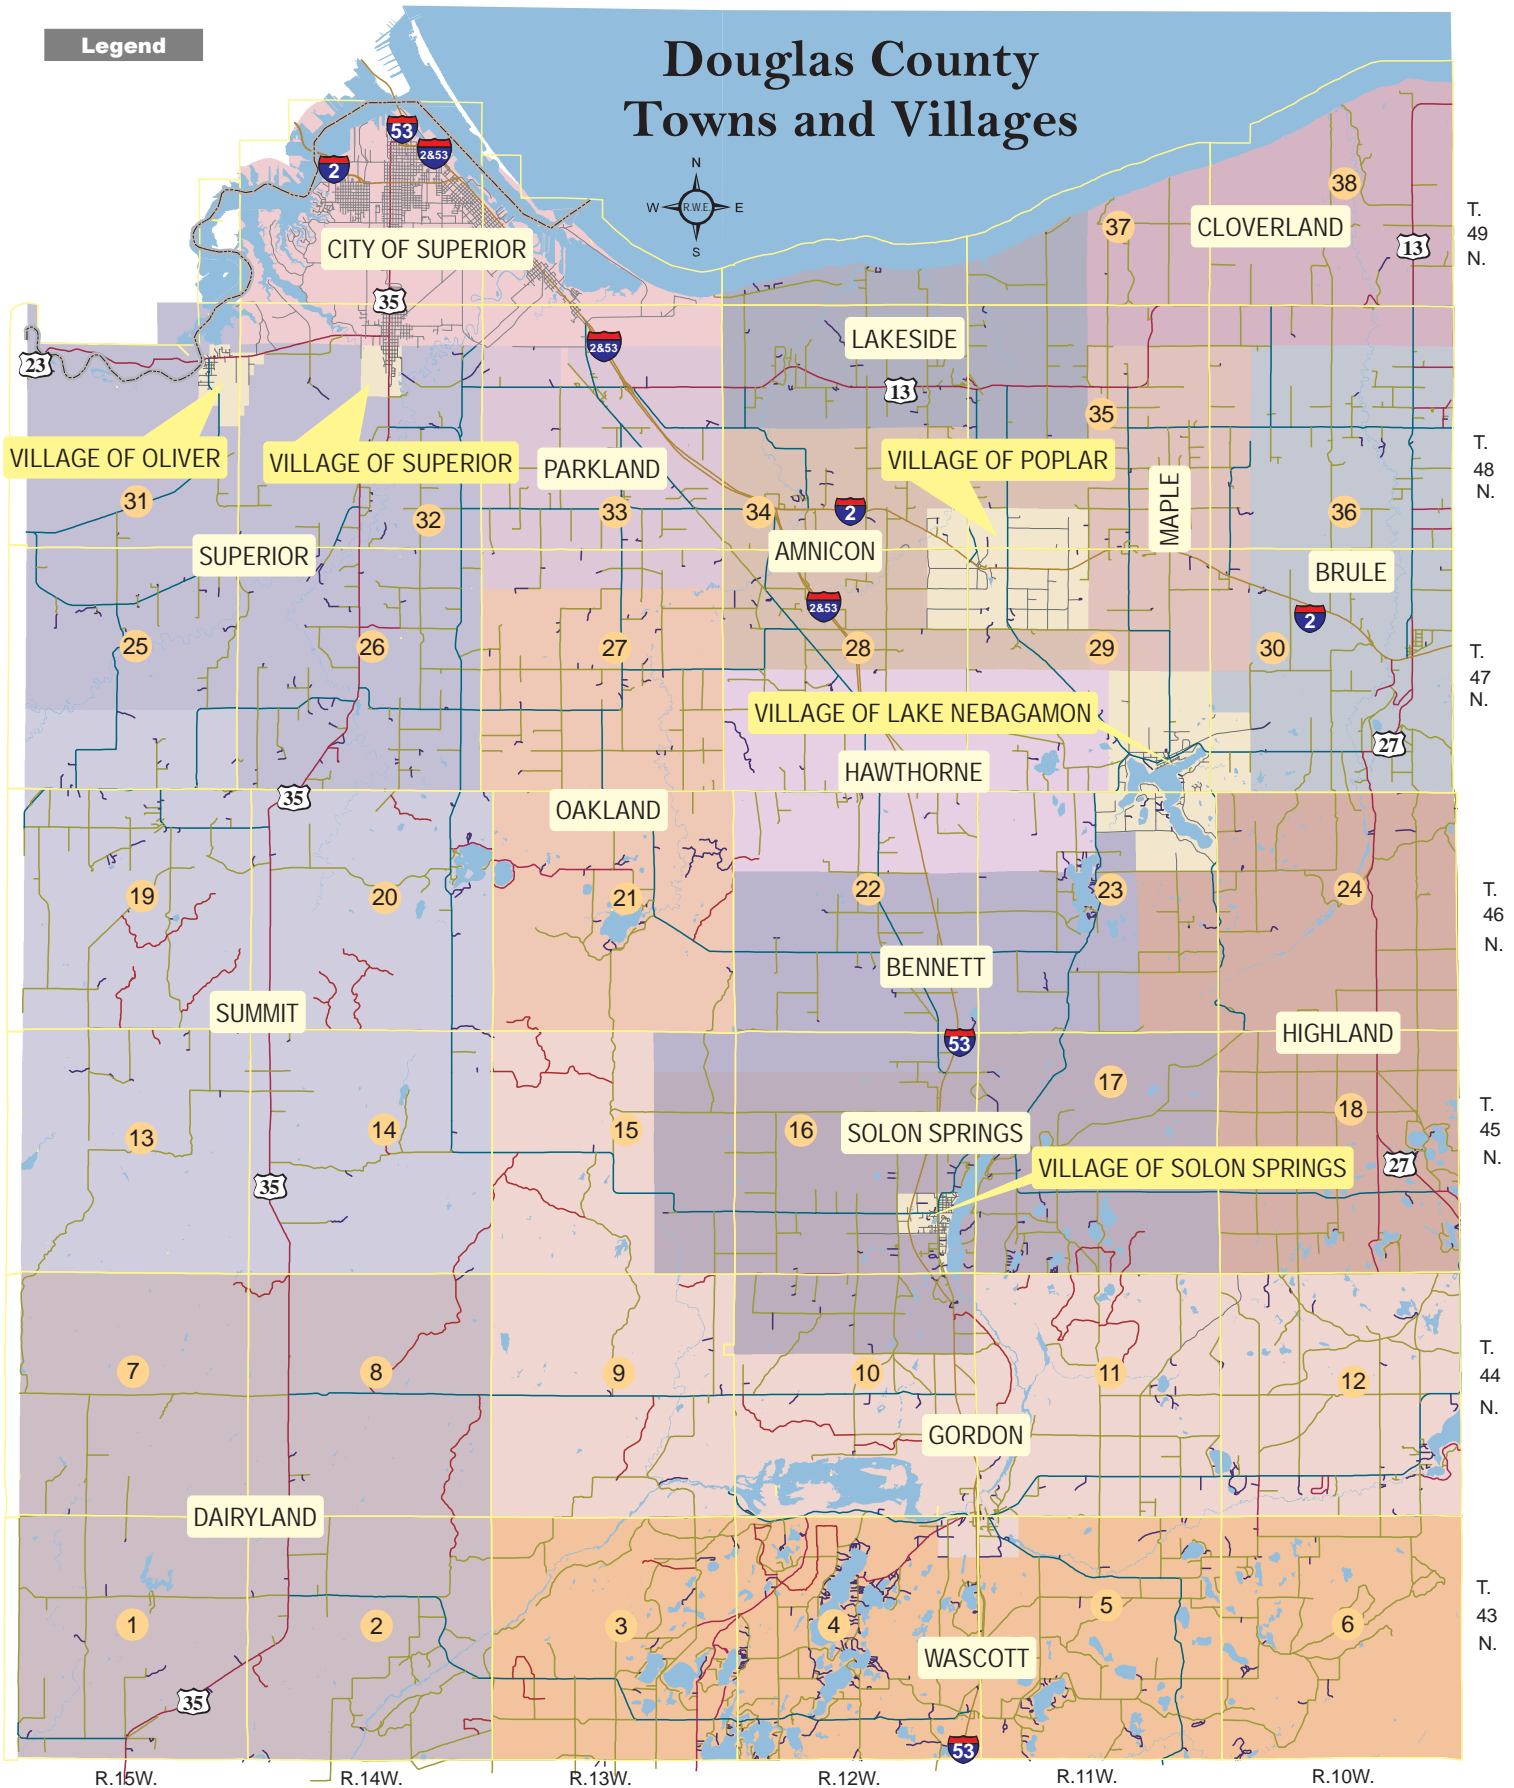

1. A request for appraisal of a piece of land is made to the County Clerk's Office.
2. An Appraisal Application Form for Douglas County Land (Form #9-1) is completed by County Clerk staff. This form is sent to the supervisor of the district in which the property is located for comments. A copy is sent to the City Planner (if located in the City of Superior); Municipal Chair/President (if located in a town or village); County Zoning Department; County Highway Department; County Forestry Department (depending on location); and Superior-Douglas County Development Association.
3. The Land and Development Committee receives a copy of the appraisal form (#9-1) with their meeting agendas. At the next meeting, the committee will decide whether to approve the property for sale and set an appraisal, or to hold the property from sale.
4. After the committee has appraised the property, the County Clerk's office sends a bid form to the individual requesting said property. Bid forms are also sent to adjacent property owners and are available for others in the County Clerk's Office. Property is advertised by publication of a Class 3 notice; sealed bids are accepted and opened at the following Land and Development Committee meeting.
5. The committee reviews the bids, rejects any bids that are less than the appraised value of the property, and may accept the bid most advantageous to the county or reject any or all bids, based on the following criteria:
 - (a) Dollar value;
 - (b) Prospective use of property;
 - (c) Prior ownership;
 - (d) Adjacent property ownership;
 - (e) Taxability of property upon transfer;
 - (f) Build ability under present zoning codes;
 - (g) Access; and
 - (h) Any other criteria the Land and Development Committee wishes to consider to evaluate any bid.
6. Notice of the pending sale is mailed to the clerk of the municipality in which the real estate is located at least three weeks prior to the time of sale.
7. A resolution is presented to the Board approving the sale.
8. A Quit Claim Deed is made out to the successful bidder.
9. Those properties that have been previously advertised for sale may be sold according to the following procedure:
 - (a) Property is advertised for sale by publication of a Class 1 notice;
 - (b) The Land and Development Committee reviews the bids, may reject any or all bids, or may accept a bid that is less than the appraised value but, cannot accept a bid that is less than the highest bid, unless the committee outlines in the resolution the reasons for accepting a bid that is less than the highest bid;
 - (c) Those properties not sold after the Class I bid opening will remain available for purchase by bid, with any bids received referred to the Land and Development Committee, in accordance with the process set out in (b) above.
 - (d) A resolution is presented to the Board approving the sale; and
 - (e) A Quit Claim Deed is made out to the successful bidder.

The U.S. Public Land System is the Rectangular Survey System used to describe all the lands within Douglas County. Original surveys were conducted by General Land Office (GLO) in Douglas County during the 1850's.

Congressional Townships were laid out with 36 Sections in the sequence as shown in the sketch to the left. Along the North and West boundaries of the Township corrections were made for the curvature of the planet. The GLO surveyor set a wood post at 1/2 mile intervals around each section, called Section Corners or Quarter Section Corners and also at the intersection with meandered bodies of water. The GLO surveyor also would reference these corners to natural features found at the site, such as trees, rock formations and streams and make notations of this in his field notes.

The tools of the GLO surveyor included a Plain Compass, Solar Compass (used to determine the meridian in areas of high magnetic attraction) and a 66.00 foot long Gunter's chain.

There are several ways that property can be described. One is by the federal method as shown in the sketch to the left. Other land may be described by State, County Plat or by Certified Survey Map which creates an official document filed at the Register of Deeds office and assigns a lot number to that property. Larger tracts can be described by a metes and bounds description which describes the property by course and distance. In any case the property is tied directly to the public land system for its base of control.

Linear Measure.

100 Links = 1 Chain
 1 Chain = 66 feet
 80 Chains = 1 Mile
 1 Mile = 5,280 feet

Square Measure

43,560 Square feet = 1 Acre
 1 Square Mile = 640 Acres

Emergency Numbers

Dial only 3 digits

9-1-1

Voice/TTY

Or dial "0" (Operator)

Tell the operator the exact location including the community name, street number and the type of help needed. Stay at the telephone.

Dial these numbers only in a real emergency. For non-emergency calls, dial the numbers shown in the "NON-Emergency Administrative Numbers" listing for the proper agency.

For aid in Fire, Police,
Rescue/Ambulance,
Sheriff

HOW TO FIND AN ADDRESS

In an effort to enable Emergency Response to County Residents and Postal Delivery, every residence in the County has been assigned an address number. The sign is located at the public or private road leading to their residence. In most cases numbers are posted on a sign located near their driveway.

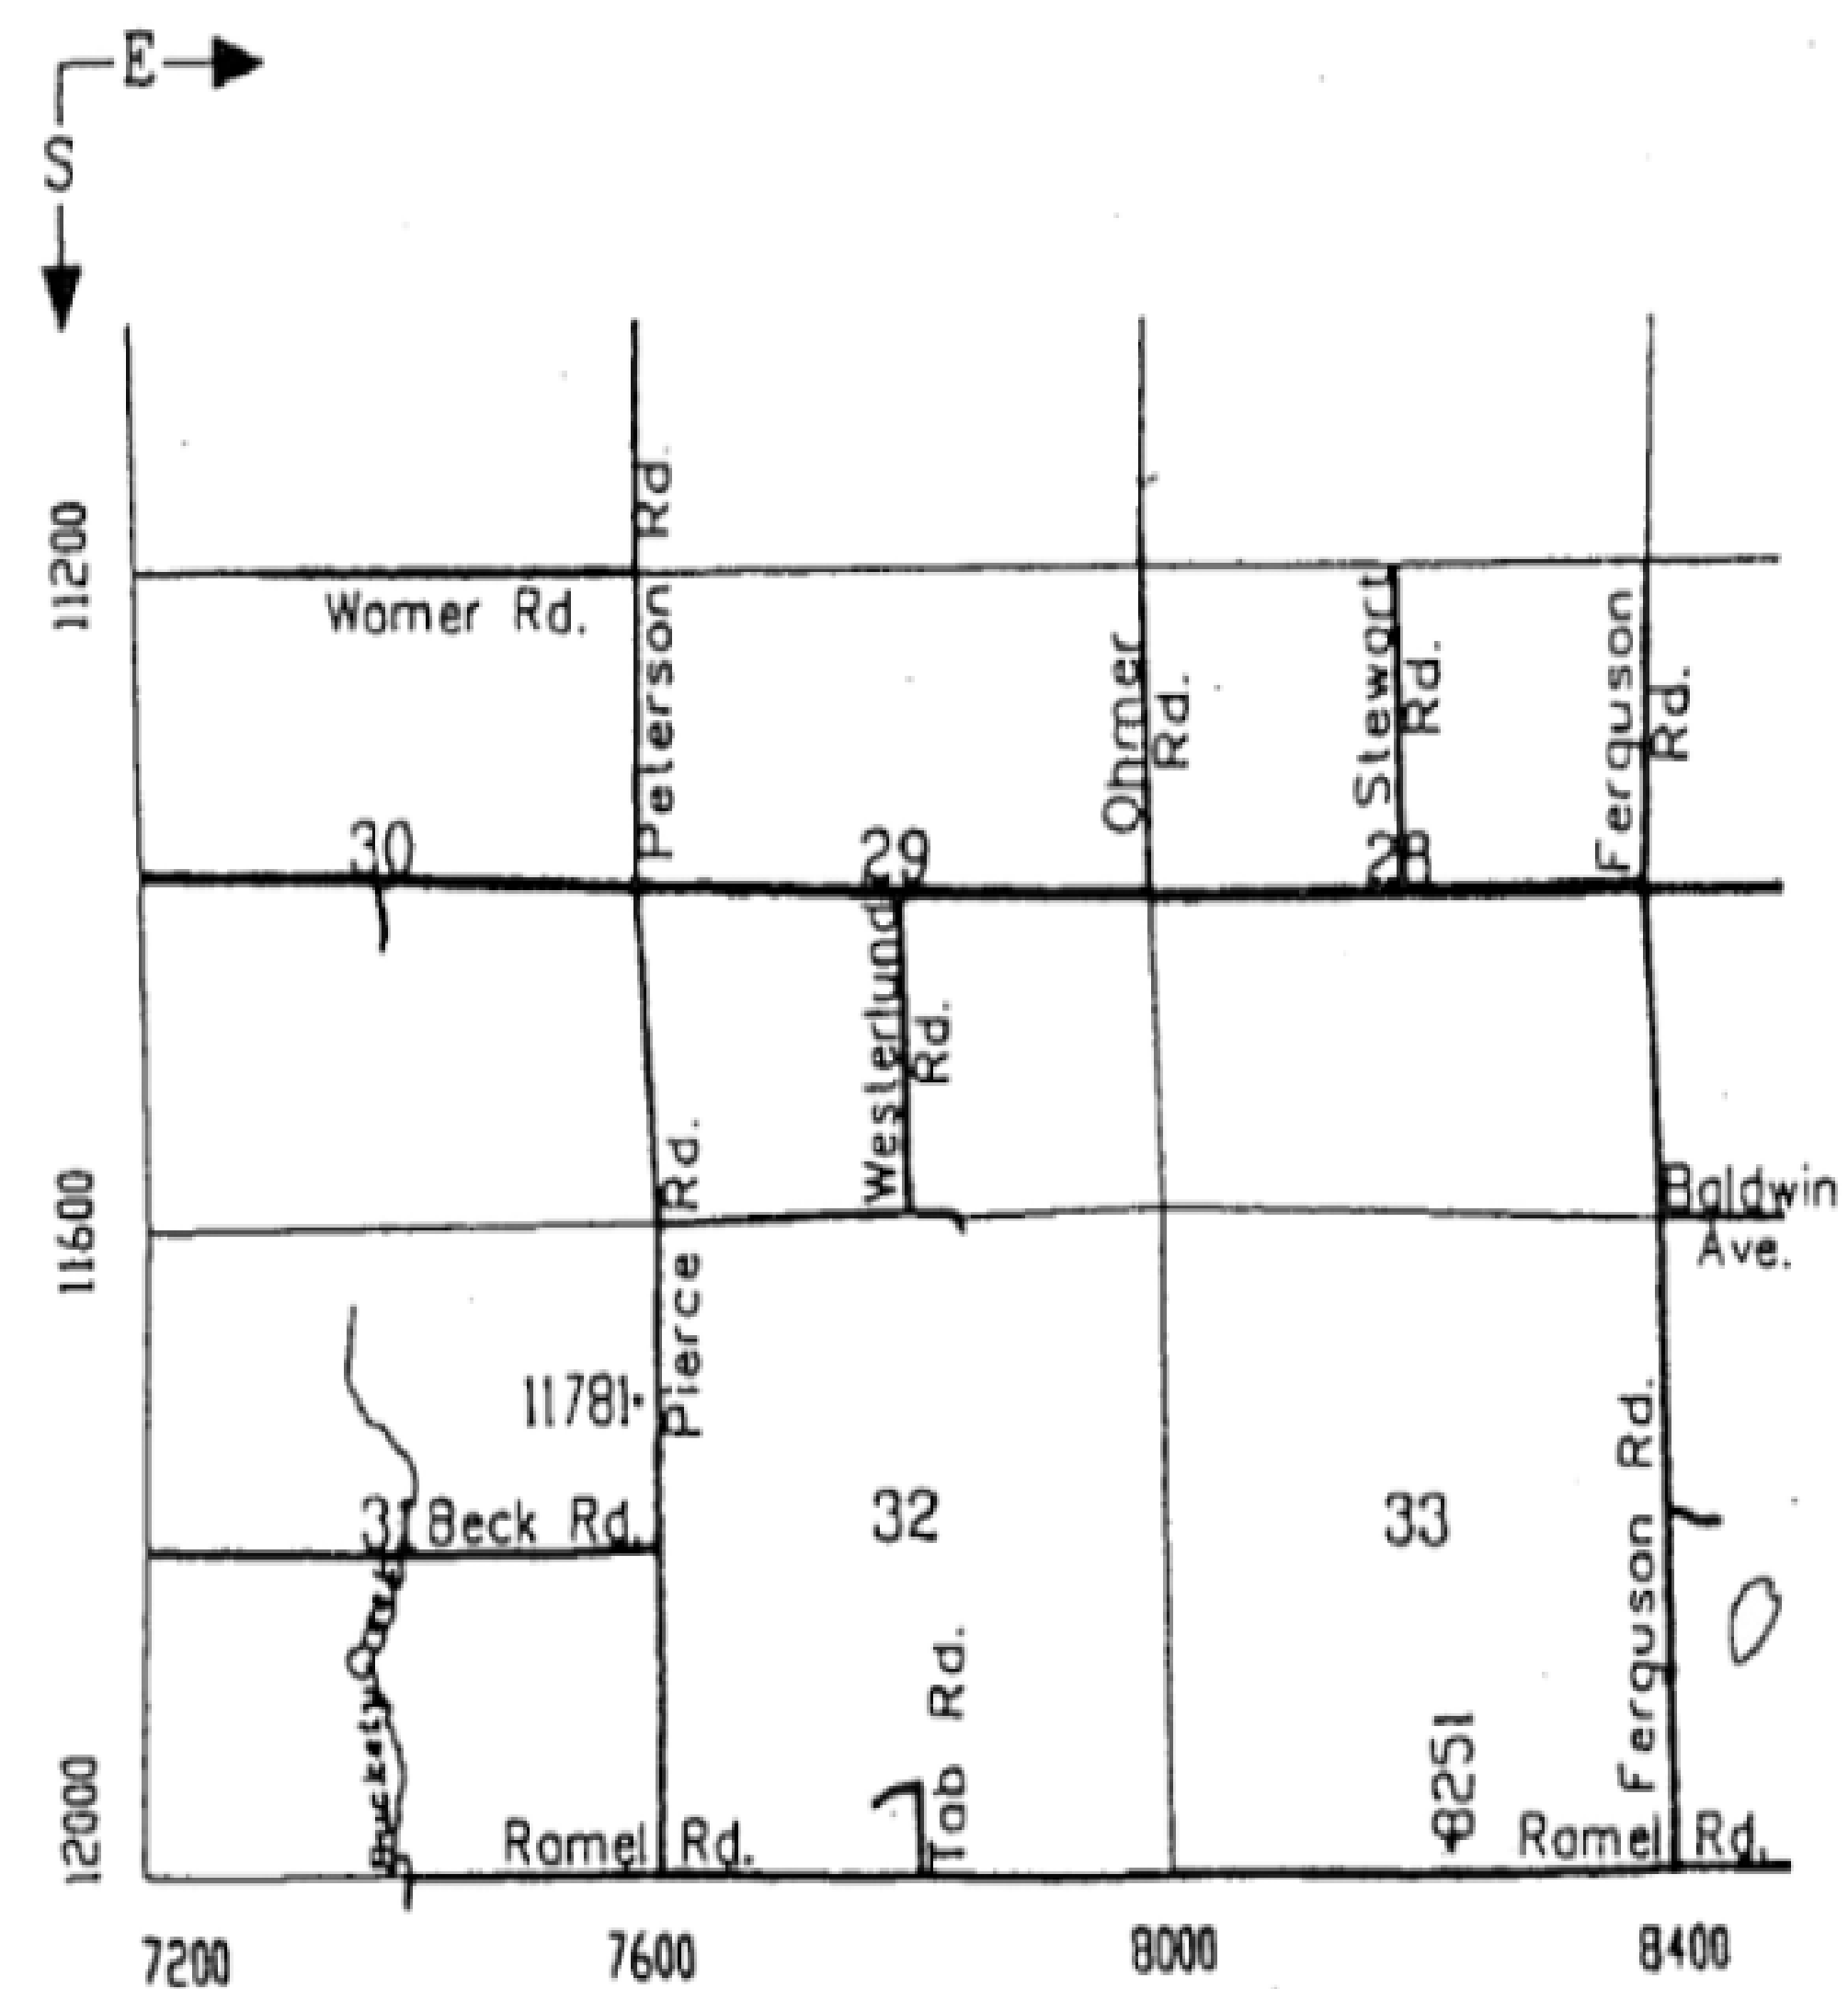

The sign includes the township name, numbers, and "S" or "E" depending on the road direction.

The County Addressing System is in grid format with 400 numbers to the mile. The numbers starting at the north border of the County get larger going to the south. The letter "S" following the numbers indicates the north/south direction of the road with even numbers on the east side and odd numbers on the west side. The letter "E" following the numbers indicates the east/west direction of the road with odd numbers on the north side and even numbers on the south side. Numbers starting at the west also get larger going to the east.

North South Direction: To find 11781 Pierce Rd. on the sample map to the right, you would go to the left margin and find the grid number 11600 and continue down the road until you see the number 11781 which would be approximately 1/4 mile south of 11600.

East West Direction: To find 8251 Ramel Rd., go to the grid across the bottom of the map and find grid number 8000. Follow the numbers along the road until you come to 8251 which would be approximately 1/2 mile east of 8000.

Remember, addresses get larger going to the south and to the east in Douglas County. Road Name Index and locations can be found at the end of this book.

47 DOUGLAS COUNTY LAKES

Wisconsin Department of Natural Resources
(608) 266-2621
www.dnr.state.wi.us

Public Access - Detailed access information is available for most counties in the state. Many public fishing piers are now wheelchair-accessible. For information on specific access sites, contact your nearest DNR office. Each office has a copy of *Fishing and Boating Access for Everyone*. Copies of individual location maps with descriptions of the amenities available at that site can be provided to you. In the column titled "Public Access," the following abbreviations describe existing access where information is available:

- BR** Boat Ramp. These are sites with a defined public boat launching facility which may or may not have parking.
- BF** Barrier-free Boat Ramp. These sites have a boarding dock or means of wheelchair access to boats.
- P** Barrier-free Pier. These piers were designed to accommodate wheelchairs.
- T** Walk in Trail. These access sites are partially developed, excluding a boat ramp, and are entirely within public lands.
- R** Roadside. These sites do not include any access developments. Public roads with a marked right-of-way extending to the water provide a limited degree of access.
- W** Wilderness in Public Ownership. A lake is in a wilderness area if there are no roads or buildings within 200 feet of the waterbody. Wilderness lakes have no defined walk-in trail to the water.
- BW** Barrier-free Wilderness Access. These sites have a firm surface to gain access to the water, but no special piers or ramps.
- NW** Navigable Water. Navigable access is provided by the presence of an inlet or outlet stream which furnishes adequate boat access to a lake. A small stream not large enough to float a boat does not provide effective navigable access.

A few counties do not have detailed access information. For those waters marked with an "x," some type of access, other than navigable water access, is available.

Regulations governing boat usage are effective on certain lakes and are posted at the public access sites.

Map - If a lake survey map showing the contour depths in a lake is available, an "X" appears in the column called "Map." Nearly half of all the named lakes in the state have been mapped. Lake survey maps provide valuable information for lake property owners and anglers who wish to know more about the lake depths.

Lake Type

The following abbreviations describe the category of lake type:

- DG = Drainage lake
SE = Seepage lake
SP = Spring lake
DN = Drained lake

Species of fish - The relative abundance of various game fish species including muskellunge, northern pike, walleye, largemouth bass, smallmouth bass, panfish, trout, catfish and sturgeon is listed. Abundance of a fish species is coded using the following symbols:

- A = Abundant
C = Common
P = Present

The absence of any symbol means that a fish species is not present.

Mercury in fish - Fish from about 600 Wisconsin lakes have been tested to measure the amount of mercury in the filets. This publication identifies those lakes that have been tested, and which ones contain advisories. Where there is mercury data, the following two symbols summarize the available information:

- ✓ One or more fish species present in the lake have been tested for mercury levels, and no advisory is necessary.
- One or more fish species present in the lake have been tested for mercury levels and the lake is under a consumption advisory.

(blank) No fish - tested as of 1995.
