HOW TO FIND AN ADDRESS IN DOUGLAS COUNTY

In an effort to enable emergency response to county residents and Postal Delivery, every structure in the County has been assigned an address number. The sign is located at the public or private road leading to the driveway.

The sign includes the township name, numbers, and “S” or “E” depending on the principal road direction.

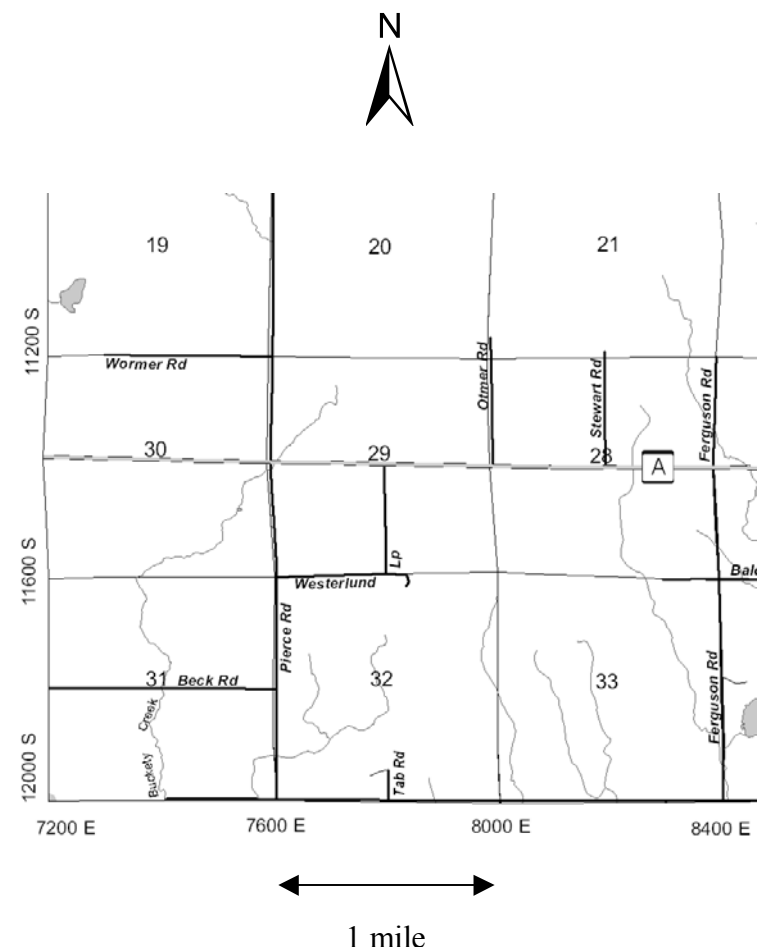

The County Addressing System is in grid format with 100 potential numbers per 1/4 mile. The numbers starting at the north border of the County increase going to the south. The letter “S” following the numbers indicates the north/south direction of the road with even numbers on the east side and odd numbers on the west side. The numbers starting at the west border increase going to the east. The letter “E” following the numbers indicates the east/west direction of the road with odd numbers on the north side and even numbers on the south side.

Examples:

North/South Direction: To locate 11781S Pierce Rd. on the sample map to the right, go to the left margin and find the grid designator 11600S. Continue south on Pierce Rd. approximately 1/2 mile south of the 11600S line on the west side of the road.

East/West Direction: To locate 7251E Beck Rd., go to the bottom margin of the map and find grid designator 7200E. Continue east on Beck Rd approximately 1/8th mile on the north side of the road.

Remember, addresses get larger going to south and east in Douglas County. The Road Name Index and locations are located at the end of this book.

PROCEDURE FOR SALE OF TAX DEEDED LANDS

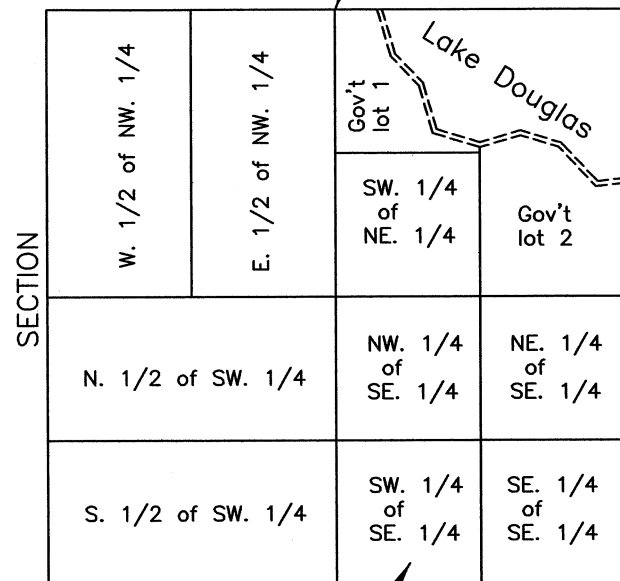

The following procedure applies to the sale of tax deeded lands and conforms with Section 75.35 of the Wisconsin Statutes:

1. A request for appraisal of a piece of land is made to the County Clerk's Office.
2. An Appraisal Application Form for Douglas County Land (Form #9-1) is completed by County Clerk staff. This form is sent to the supervisor of the district in which the property is located for comments. A copy is sent to the City Planner (if located in the City of Superior); Municipal Chair/President (if located in a town or village); County Zoning Department; County Highway Department; County Forestry Department (depending on location); and Superior-Douglas County Development Association.
3. The Land and Development Committee receives a copy of the appraisal form (#9-1) with their meeting agendas. At the next meeting, the committee will decide whether to approve the property for sale and set an appraisal, or to hold the property from sale.
4. After the committee has appraised the property, the County Clerk's office sends a bid form to the individual requesting said property. Bid forms are also sent to adjacent property owners, if:
 - a) The adjacent property touches the appraised property, either by being alongside the property or diagonal to it;
 - b) The adjacent property is separated by an alley, whether physically built or not; or
 - c) The adjacent property is separated by a platted street, which has not been physically built.

and are available for others in the County Clerk's Office. Property is advertised by publication of a Class 3 notice; sealed bids are accepted and opened at the following Land and Development Committee meeting.

5. The committee reviews the bids, rejects any bids that are less than the appraised value of the property, and may accept the bid most advantageous to the county or reject any or all bids, based on the following criteria:
 - 1) Dollar value;
 - 2) Prospective use of property;
 - 3) Prior ownership;
 - 4) Adjacent property ownership;
 - 5) Taxability of property upon transfer;
 - 6) Build ability under present zoning codes;
 - 7) Access; and
 - 8) Any other criteria the Land and Development Committee wishes to consider to evaluate any bid.
6. Notice of the pending sale is mailed to the clerk of the municipality in which the real estate is located at least three weeks prior to the time of sale.
7. A resolution is presented to the Board approving the sale.
8. A Quit Claim Deed is made out to the successful bidder.
9. Those properties that have been previously advertised for sale may be sold according to the following procedure:
 - a) Property is advertised for sale by publication of a Class 1 notice;
 - b) Adjacent property owner(s) (as defined in 4 above) is(are) notified;
 - c) The Land and Development Committee reviews the bids, may reject any or all bids, or may accept a bid that is less than the appraised value but, cannot accept a bid that is less than the highest bid, unless the committee outlines in the resolution the reasons for accepting a bid that is less than the highest bid. As a general practice, the committee will not consider a bid that is less than 75% of the appraised value. However, the committee reserves the right to accept any bid if the proposed use and/or development of the property is deemed desirable and advantageous to the county;
 - d) Those properties not sold after the Class I bid opening will remain available for purchase by bid, with any bids received referred to the Land and Development Committee, in accordance with the process set out in (c) above.
 - e) A resolution is presented to the Board approving the sale; and
 - f) A Quit Claim Deed is made out to the successful bidder.

The U.S. Public Land System is the Rectangular Survey System used to describe all the lands within Douglas County. Original surveys were conducted by General Land Office (GLO) in Douglas County during the 1850's.

Congressional Townships were laid out with 36 Sections in the sequence as shown in the sketch to the left. Along the North and West boundaries of the Township corrections were made for the curvature of the planet. The GLO surveyor set a wood post at 1/2 mile intervals around each section, called Section Corners or Quarter Section Corners and also at the intersection with meandered bodies of water. The GLO surveyor also would reference these corners to natural features found at the site, such as trees, rock formations and streams and make notations of this in his field notes.

The tools of the GLO surveyor included a Plain Compass, Solar Compass (used to determine the meridian in areas of high magnetic attraction) and a 66.00 foot long Gunter's chain.

There are several ways that property can be described. One is by the federal method as shown in the sketch to the left. Other land may be described by State, County Plat or by Certified Survey Map which creates an official document filed at the Register of Deeds office and assigns a lot number to that property. Larger tracts can be described by a metes and bounds description which describes the property by course and distance. In any case the property is tied directly to the public land system for its base of control.

Linear Measure.

- 100 Links = 1 Chain
- 1 Chain = 66 feet
- 80 Chains = 1 Mile
- 1 Mile = 5,280 feet

Square Measure

- 43,560 Square feet = 1 Acre
- 1 Square Mile = 640 Acres

DOUGLAS COUNTY LAKES

Public Access - Detailed access information is available for most counties in the state. Many public fishing piers are now wheelchair-accessible. For information on specific access sites, contact your nearest DNR office. Each office has a copy of *Fishing and Boating Access for Everyone*. Copies of individual location maps with descriptions of the amenities available at that site can be provided to you. In the column titled “Public Access,” the following abbreviations describe existing access where information is available:

- BR** Boat Ramp. These are sites with a defined public boat launching facility which may or may not have parking.
- BF** Barrier-free Boat Ramp. These sites have a boarding dock or means of wheelchair access to boats.
- P** Barrier-free Pier. These piers were designed to accommodate wheelchairs.
- T** Walk in Trail. These access sites are partially developed, excluding a boat ramp, and are entirely within public lands.
- R** Roadside. These sites do not include any access developments. Public roads with a marked right-of-way extending to the water provide a limited degree of access.
- W** Wilderness in Public Ownership. A lake is in a wilderness area if there are no roads or buildings within 200 feet of the waterbody. Wilderness lakes have no defined walk-in trail to the water.
- BW** Barrier-free Wilderness Access. These sites have a firm surface to gain access to the water, but no special piers or ramps.
- NW** Navigable Water. Navigable access is provided by the presence of an inlet or outlet stream which furnishes adequate boat access to a lake. A small stream not large enough to float a boat does not provide effective navigable access.

A few counties do not have detailed access information. For those waters marked with an “x,” some type of access, other than navigable water access, is available. Regulations governing boat usage are effective on certain lakes and are posted at the public access sites.

Map - If a lake survey map showing the contour depths in a lake is available, an “X” appears in the column called “Map.” Nearly one fourth of all the named lakes in the state have been mapped. Lake survey maps provide valuable information for lake property owners and anglers who wish to know more about the lake depths.

Lake Type - The four lake types identified in this publication are defined on page one. The following abbreviations describe the category of lake type:

- DG = Drainage lake SE = Seepage lake
- SP = Spring lake DN = Drained lake

Species of fish - The relative abundance of various game fish species including muskellunge, northern pike, walleye, largemouth bass, smallmouth bass, panfish, trout, catfish and sturgeon is listed. Abundance of a fish species is coded using the following symbols:

- A = Abundant C = Common P = Present
- The absence of any symbol means that a fish species is not present.

Some recent exotic species -

- E = Eurasian Water Milfoil (*Myriophyllum spicatum*)
It is an aquatic plant.
- Z = Zebra Mussel (*Dreissena polymorpha*).

Hook into healthy Wisconsin fish!

This advice applies to most inland lakes and streams.

Women of childbearing years, nursing mothers and all children under 15 may eat:

- 1 meal per week of bluegill, sunfish, black crappie, white crappie, yellow perch or bullheads, **Do not eat Muskies!**, AND
- 1 meal per month of walleye, northern pike, smallmouth bass, largemouth bass, channel catfish, flathead catfish, white sucker, drum, burbot, sauger, sturgeon, carp, white bass, rock bass or other species.

Men, and women beyond their childbearing years may eat:

- unlimited amounts of bluegill, sunfish, black crappie, white crappie, yellow perch, or bullheads, AND
- 1 meal per week of northern pike, smallmouth and largemouth bass, channel and flathead catfish, walleye or other species.

Some waters contain fish with PCBs and higher mercury levels that pose a larger health concern. For more information, call your local DNR office, your local health department, or visit the web: <http://www.fishingwisconsin.org>
